PragmaDev to assign GsvTek as chinese distributor.

Paris - France - June 2nd, 2003 - *PragmaDev* has assigned Beijing Gold-Silver-Valley Technological consultancy Ltd as a chinese distributor of *Real Time Developer Studio, PragmaDev* set of tools for the development of real time and embedded software.

Real Time Developer Studio is based on SDL-RT graphical representations of traditional concepts used in the real time domain without leaving behind legacy code and years of experience. *Real Time Developer Studio* can generate full application code out of SDL-RT design embedding RTOS system primitives.

Furthermore the connection between *PragmaDev's Real Time Developer Studio* and cross-debuggers allow graphical debugging in the SDL-RT diagrams and at C level, as well as graphical traces based on MSC diagrams, of code running on target.

About PragmaDev

PragmaDev is a privately held company based in Paris France that provides a set of tools for the development of real time and embedded software: *Real Time Developer Studio*.

Real Time Developer Studio technology was one of the winners of the 2001 edition of the national competition on innovative technologies organized by the French ministry of research.

PragmaDev is an Altium, Atos Origin, CMX Systems, OSE, OSS Nokalva, Mentor Graphics, Sun Microsystems and Wind River Systems active partner.

About SDL-RT

SDL-RT (Specification and Description Language - Real Time) is the real time extension to well known SDL (Specification and Description Language) standardized by ITU (International Telecommunication Union). It introduces the missing concepts in SDL such as semaphores manipulations and embedded C language gathering the original languages benefits:

- **Graphical representations**
- **Object orientation**
- **Precision**

Version 2.0 introduces UML (Unified Modeling Language) support.

Press release

SDL-RT is free and available on http://www.sdl-rt.org.

About Beijing Gold-Silver-Valley Technological Consultancy Ltd.

GsvTek is the leading provider of real time software tool and middleware, from telecommunication protocol, aerospace/aeronautics control system, consumer electronic to automobile. With innovative SDL-RT, more and more R&D departments in China will use *Real Time Developer Studio* and middleware from GsvTek, to shorten time to market with the help of the university/academic and on-site training of real time software engineering provided by GsvTek.
